Notes and assumptions

Material take-off for a 4-bedroom duplex (14.4m x 11.4m footprint across two floors) including substructure, frame, masonry, roof, finishes, openings, and building services based on drawing specifications and standard Nigerian QS practices.

1. Building footprint is rectangular at 14.40m x 11.40m giving 164.16m² per floor and 328.32m² total floor area.
2. Foundation is reinforced strip footing at 1.2m depth with 5 courses of 9 inch sandcrete blocks filled solid with concrete below DPC.
3. First floor is a 150mm thick suspended reinforced concrete slab over the full footprint.
4. Roof structure is timber truss pitch roof covered with stone-coated roofing tiles, pitch assumed at 30 degrees.
5. Standard Nigerian building construction practices adopted in Lekki, Lagos State, with 5 percent wastage allowance included across materials.

Quantities were measured from the drawing by an AI model and checked against standard Nigerian building practice. Prices are from listed vendors on the date shown and exclude labour, transport and VAT unless stated by the vendor. Confirm quantities with your builder and prices with the vendor before paying.
